INSTITUTIONAL & TECHNICAL BRIEF · 2026

WHEN A SITUATION BECOMES DIFFICULT, KNOWING WHERE TO START.

AtyKids is a practical, non-medical platform designed for the adults who support neurodivergent children, children with disabilities, or children with additional support needs.

Parents, teachers, aides, educators, and professionals already have access to plenty of information. The difficulty often appears at the moment of taking action:

> **WHAT CAN WE TRY RIGHT NOW?**
>
> **HOW DO WE PREPARE WHAT COMES NEXT?**
>
> **WHO SHOULD WE TURN TO?**

AtyKids starts from the situation the adult describes and helps them identify a concrete next step, within a clearly defined framework.

WHY NOW?

The product is operational.

Its territorial and multilingual architecture is in place.

AtyKids is now entering a new phase: broadening distribution and exploring collaborations with companies, organizations, institutions, and partners.

THE GOAL IS TO IDENTIFY THE USES, CHANNELS, AND FORMS OF COLLABORATION THAT ARE RELEVANT FOR EACH TERRITORY.

ONE ECOSYSTEM, SEVERAL POINTS OF SUPPORT

6 specialized Assistants
for everyday situations

3 Expert domains
to go deeper on a question

ATLAS
to identify resources and local contacts in each territory

Studio
to create concrete supports

Resources
free, ready-to-use tools

3 LANGUAGES
Français · English · Español

4 CURRENT TERRITORIES
France · United States · Canada · Costa Rica

470,000+
resources mapped in ATLAS

INSTALLABLE WEB APP
mobile · tablet · desktop

NON-MEDICAL · DESIGNED FOR THE ADULT · DOES NOT REPLACE PROFESSIONALS

A SITUATION MAY CALL FOR ACTING, UNDERSTANDING, FINDING, OR CREATING.

AtyKids does not try to meet every need with a single tool. Each component answers a different question.

ACT — THE 6 ASSISTANTS

When an everyday situation calls for a concrete next step.

Malo
Daily life & routines

Lina
Transitions

Nino
Activities

Sacha
Tension & next step

Camille
Meetings & conversations

Basile
Factual observation & adaptation

The adult describes what is happening. AtyKids helps them start from the right angle, without requiring them to know the name of the right tool in advance.

GO DEEPER — THE 3 EXPERTS

Rights & procedures
Understand procedures and the documents to prepare for your territory.

Home education & learning
Understand the local framework and organize learning at home.

Documents and paperwork
Read PDFs or photos, understand sections and prepare your answers.

Reference points and general explanations — never a diagnosis, never personalized legal advice.

FIND — ATLAS

When the adult knows outside support is needed but does not know who to turn to.

ATLAS brings together professionals, organizations, services, and programs by territory.

CREATE — STUDIO

When a situation calls for a concrete support.

Formats currently available:

- Visual sequence
- First / Then
- Checklist
- Choice board
- Routine
- Support card

GET STARTED — THE RESOURCES

- AtyKids SAFE
- Guides
- Glossary
- Visual timer
- Visual sound meter
- Choice wheel
- Text reader
- and more tools

SAFE, the Guides and the Glossary are open without an account. The everyday tools open with a free account.

A SITUATION → THE RIGHT STARTING POINT → A NEXT STEP

The 6 Assistants, the Experts, ATLAS and the Studio make up AtyKids Premium; the Resources remain free. And next time, the adult doesn't start from scratch: what they choose to keep stays available to pick up where they left off, and can be deleted at any time.

TRANSLATION IS NOT ENOUGH. THE TERRITORY CHANGES THE ANSWER.

AtyKids distinguishes two independent dimensions:

LANGUAGE
Français · English · Español

TERRITORY
France · United States · Canada · Costa Rica

- A French-speaking family may live in the United States.
- Someone may use AtyKids in Spanish in Canada.
- A translated interface never turns a French rule into a rule that applies in another country.

For rights, procedures, programs, agencies, or local resources, the territory is part of the answer.

In federal countries, the state, province, or territory also matters: in Canada, ATLAS coverage is nationwide, while contextualized rights-and-procedures content currently focuses on Ontario.

ATLAS — 470,000+ RESOURCES

ATLAS brings together professionals, organizations, services, and programs drawn from territorial and institutional public sources, mapped down to the subdivision.

FRANCE | **UNITED STATES** | **CANADA** | **COSTA RICA**

France · 18/18 regions — United States · 50 states, DC and 5 territories — Canada · 13/13 provinces and territories — Costa Rica · 7/7 provinces. Volumes vary with each territory's official sources: what compares honestly is territorial coverage.

SOURCES CURRENTLY IN USE

FRANCE
- FINESS / DREES
- Éducation nationale / DEPP
- RPPS / Annuaire Santé
- Service-Public.gouv.fr

UNITED STATES
- NPPES
- ECTA / OSEP · IDEA

CANADA
- Provincial and territorial registries

COSTA RICA
- CCSS
- MEP
- CONAPDIS
- Colegio de Terapeutas

ATLAS TRANSPARENCY

PROVENANCE
Every data point remains linked to its source.

DATE
The date shown corresponds to when the information was collected or indexed.

INDEPENDENCE
No listing in ATLAS can be bought.

LIMITS
AtyKids does not certify the quality, availability, or specialization of any professional or organization.

BEING LISTED IN ATLAS DOES NOT MEAN BEING RECOMMENDED BY ATYKIDS.

An official source documents a piece of information. It never means that the institution recommends, endorses, or validates AtyKids.

COSTA RICA

Costa Rica is one of AtyKids' four current territories, not a market simply served by a Spanish translation.

7 provinces | **Interface available in Spanish, French, and English** | **Territorial ATLAS** | **Costa Rican public sources integrated**

OUR GOAL IN COSTA RICA

To engage with the relevant stakeholders in order to understand:

- where AtyKids can be useful,
- where it is not,
- and which collaborations would be relevant for the territory.

TRUST BEGINS WITH EXPLICIT LIMITS.

1 — NON-MEDICAL

AtyKids is not a medical device.

The platform does not provide:

- diagnosis
- screening
- risk scoring
- clinical testing
- psychometric assessment
- medical opinion
- prescription
- care plan

And it never replaces a qualified professional.

2 — ADULT FIRST

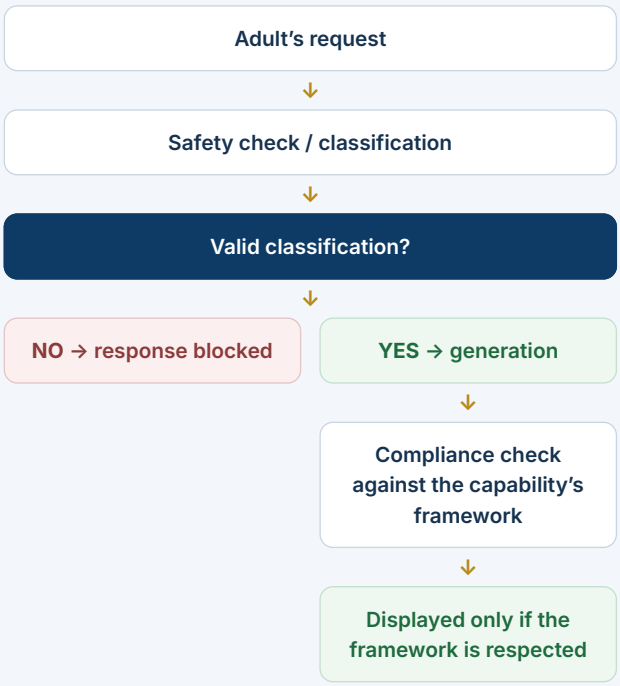
AtyKids is designed for the adult who provides support.

DESCRIBES → CONSULTS → ADAPTS → DECIDES

The Assistants and the Experts are not designed to be used by a child alone.

Created supports and certain Resources may then be used with the child under the adult's responsibility.

3 — CONTROLS AROUND RESPONSES



These controls apply to classification and adherence to the framework.
They do not guarantee that every sentence produced is perfect, and they never replace the adult's own reading.

4 — SOURCES & TRACEABILITY

DOCUMENTED FACT
Information backed by an identifiable source, a territory, and, where applicable, a verification date.

EXPLANATION
Context that makes the information understandable.

SUGGESTION
A practical idea to try and adapt; it is neither an obligation nor an institutional fact.

Documented public content — notably the Glossary, the Guides, and ATLAS — shows its references when the topic requires it.

Private conversational responses are an aid to the adult; they are never presented as a documentary source or as medical advice.

A SOURCE DOCUMENTS A PIECE OF INFORMATION. IT DOES NOT VALIDATE ATYKIDS.

None of the institutional sources cited by AtyKids has, by the mere fact of being cited, endorsed or evaluated the platform.

MINIMIZE DATA.
GIVE USERS CONTROL.
STATE CLEARLY WHAT IS CLAIMED.

MINIMIZATION

AtyKids applies a minimization principle: only the data necessary for each use should be collected.

PAYMENTS

Payments are processed by Stripe.

Card data does not pass through AtyKids' servers.

THE CHILD'S IDENTITY IS NOT REQUIRED

In free-text fields, AtyKids asks users not to unnecessarily submit:

- a child's full name
- an address or contact details
- health information that is not needed
- information allowing direct identification

USER CONTROL

From their personal account, users can:

EXPORT THEIR DATA

DELETE THEIR ACCOUNT

DATA MODEL

DATA IS NEITHER SOLD NOR RENTED.

ACCESSIBILITY BY DESIGN

The public site offers, among other features:

4 reading themes · **light / dark mode** · **dyslexia-friendly font** · **3 text sizes** · **line-height adjustment** · **letter & word spacing** · **reduced animations** · **keyboard navigation** · **"skip to content" link**

TRANSPARENCY

No external accessibility audit has been conducted yet.

AtyKids therefore currently claims no RGAA or WCAG conformance.

INSTITUTIONAL VALIDATION

AtyKids does not claim any institutional validation, certification, or scientific evaluation that has not been formally obtained.

AtyKids Pro: connect your team and families.

A dedicated professional workspace to prepare responses, use AtyKids tools and fund Premium accounts for the families you work with.

For your team

- A workspace and individual professional access.
- Assistants, Experts, ATLAS and Studio to prepare your work.
- Information sheets that families have chosen to share with you.
- Proposals and resources to review before sharing them.

For families

- Their own account and a personal space that remains private.
- Premium access funded by your organization if you choose to include it.
- Control over what they share and which professionals receive it.
- The choice to keep or decline a proposal they receive.

Continuity, with the family's agreement

1

CHOOSE

The family shares the information that matters.

2

PREPARE

The professional prepares a response and resource.

3

CONTINUE

The family reviews and keeps what works for them.

Funding an account does not open its private conversations. Each share is a separate decision. A printed or downloaded copy cannot be recalled remotely.

A license matched to your configuration

The pricing calculator separates professional access from funded family Premium accounts. It shows monthly or annual billing in the three available currencies. Usage limits and plan terms continue to apply to each account.

Build your Pro plan

A clear view of how the platform works.

AtyKids is an installable web application for phones, tablets and computers. Personal and professional spaces use the same ecosystem with separate access permissions.

ACCOUNTS AND ACCESS

Authentication, server-side access checks and separation of data according to the account, team and authorized shares.

SUBSCRIPTIONS AND PAYMENT

Stripe hosts payment and manages subscriptions. Card details do not pass through AtyKids servers. The billing portal provides invoices and subscription management.

ASSISTANTS, EXPERTS AND STUDIO

The content needed for the request is processed to prepare a response or resource. The adult reviews, corrects and decides. The service does not diagnose or make medical decisions.

LANGUAGE AND TERRITORY

French, English and Spanish. France, the United States, Canada and Costa Rica. Interface language does not determine the country or applicable rules.

Sharing is a choice, never automatic

Professionals work from the shared information sheet and, when separately authorized by the family, selected notes used to prepare a response. Withdrawal or expiry blocks the relevant future access. Private account conversations do not become a shared record.

Current references for your review

The privacy policy describes service providers, purposes, retention periods and possible transfers. The terms of use set out the Pro offer, funded accounts and service limits.

Privacy policy

Terms of use

An available plan. A project that fits your needs.

Practices, schools, nonprofits, facilities and other organizations can configure a Pro license. Requirements specific to a network or deployment need a separate review.

Available in the Pro plan

- Professional workspace and team access management.
- Funded family Premium accounts for your chosen configuration.
- Information sheets shared at each family's initiative.
- Preparation with Assistants, Experts and Studio.
- Proposals and resources reviewed before sharing.
- Monthly or annual billing through Stripe.

To assess for your project

- Connection to your corporate directory or SSO.
- Imports, APIs or integration with third-party software.
- Network-specific deployment requirements.
- Specific service or availability commitments.
- Additional contractual, security or data requirements.

SSO, integrations and specific service commitments are not included by default. Feasibility and terms are verified before any commitment.

Your next step

Choose the number of professionals and families to fund on the pricing page. For specific requirements or a partnership, tell us about your project on the Organizations page.
